Important Information

TAL, its related bodies corporate and their directors and associates do not guarantee any particular rate of return, the repayment of capital or income, that the objective of investment options will be achieved, or the performance of any of the products or investment options referred to in this Investment Update unless otherwise stated. They are not a bank deposit or other bank liability and are subject to investment risk including possible delays in repayment and loss of the interest and principal invested. Past performance is not a reliable indicator of future performance. The value of an investment may rise or fall with changes in the market.

The information contained in this Investment Update is general information only and does not constitute financial or taxation advice. It does not take into account your individual objectives, financial situation or particular needs (your circumstances). TAL recommends that you read the relevant Product Disclosure Statement or other offer documentation provided to you when you acquired the product, and consider obtaining independent financial and taxation advice specific to your circumstances before making any financial decision.

How we manage your investment

Processing of contributions and withdrawals

Subject to regulatory approval (where required), we reserve the right to suspend or restrict the processing of some or all transactions where:

- in our absolute discretion, market disruptions or extraordinary circumstances mean that it would not be fair and reasonable in the interests of all policyholders to continue processing transactions;
- for whatever reason, we are unable to determine the unit price(s) at which transactions should be processed.

The temporary suspension or restriction of processing of transactions will be lifted when the risk to policy owners has abated sufficiently to make it fair and reasonable to resume processing transactions.

Additionally, if we do not receive all the necessary information, we may reject an application for units in whole or in part until all completed information is received by TAL.

Identification requirements

The AML/CTF Act requires us to identify you and verify your identity when you make withdrawals from your investment. Generally, you will need to provide certain documents (such as a certified copy of your passport or current driver's licence) to establish or verify your identity. If you do not provide identifying documents, or if we are unable to adequately verify your identity, we may not be able to process your withdrawal. We may decide to delay or refuse any request or transaction, including by suspending the issue or withdrawal of units, if we are concerned that the request or transaction may breach any obligation of, or cause us to "commit or participate in an offence under the AML/CTF Act. If we take this step, we will not be liable for any loss incurred by you.

Privacy

The way in which TAL collects, handles, secures and discloses your personal information is set out in the TAL Privacy Policy which is available on our website www.tal.com.au/Privacy-Policy or a copy is available free of charge on request.

TAL has processes in place to help to prevent unauthorised people from gaining access to your information. However, there are some steps that you can take to help protect your personal information from unauthorised access or use. The website of the Office of the Australian Information Commissioner at www.oaic.gov.au contains useful information on how you can protect your personal information.

How unit pricing works

The current process to determine unit prices may differ from any process description provided when this product commenced. Therefore, we provide this description of how our unit pricing process works currently. When you invest money in an investment option, your money is pooled together with that of other policy owners. TAL then uses this pool of funds to invest in assets which are managed on behalf of all policy owners. All units within each Unit Linked investment option have an equal value. Unit prices for these investment options are determined daily (for each Business Day) by dividing the total net asset value of the investment option by the number of units on issue within that investment option.

The net asset value of all investment options includes the market value of the assets (including provision for tax benefits that may arise in the future) and provisions for fees, taxes, transaction costs and any other expenses of the option. We use the most recent best estimate of these provisions in each day's net asset value. These estimates are updated regularly and may be subject to change.

Withdrawals and benefit payments

TAL's current process is to calculate the withdrawal value using the latest available unit price at the time of calculating the payment. This current process may differ from the benefit calculation procedure in your original product terms.

Adjustments

Very occasionally, errors occur that have a material effect on the value of your account. When this happens, TAL will adjust your account as follows:

- for policies that are still current, we will adjust the investment to ensure it is in the position it should have been had the error not occurred; and
- for policies that have exited, compensation may be paid where the adjustment to your account is at least \$5.

Where an exited policy has been overpaid, TAL may seek to recover the overpayment from you.

Fees

We will provide you with 30 days' prior written notice before introducing any additional fee(s) or before increasing existing fee(s) (other than CPI increases). Standard rounding practices apply to CPI increases to fees.

About the investment information

Investment management arrangements

TAL invests contributions received into the investment option(s) that you have selected. These investment options form part of a life insurance policy issued by TAL. This has not changed. However, the assets supporting the investment options forming part of the policy are managed by a number of external fund managers. Please visit the [Investment Philosophy webpage](#) for more information.

Performance returns

Investment performance information as at 30 June 2025 is rounded to one decimal place. The calculation of performance returns is based on the movement of unit prices over the period reported.

The performance returns shown are calculated after the deduction of any tax, asset management charge and investment costs attributable to the investment option and before the deduction of any other fees and rebates that may be applicable to your policy. Performance returns are the annual returns for the investment option as a whole.

For current investment performance information, see the ‘TAL Performance Quarterly Reports’ on the [Investment Updates](#) section of our website.

Past performance is not necessarily indicative of future performance.

Asset allocations and benchmarks

Asset allocations as at 30 June 2025 and 30 June 2024 for each of the investment options have been rounded to the nearest one decimal place. The actual allocations may vary from time to time due to market fluctuations and investment decisions. A limited portion of the investment portfolios may be held as cash for liquidity purposes. For current or further information about asset allocation benchmarks and minimum and maximum ranges, please contact your financial adviser, call us or see the ‘TAL Asset Allocation Quarterly Reports’ on the [Investment Update](#) section of our website.

Investment in derivatives

Derivatives such as futures, forwards, options and swaps (as applicable) may be used, within agreed limits, by the underlying investment managers in managing the various asset classes.

Changes to the investment options

TAL reserves the right to withdraw or close an investment option. We may also change any other aspect of any investment option that you invest in at any time. You will be notified in writing of any such change. If an investment option is withdrawn, we will transfer your investment to the nearest equivalent option available at that time.
